

Press release

Future-proof proposal and proposal management systems: the Versicherungskammer Group trusts adesso insurance solutions

- Modernization of policy management for private health insurance
- Enhancement of the experience of customers and sales partners thanks to the development of new methods for rates, quotes, and proposals

Dortmund, February 23, 2023 – The health and travel insurers of the Versicherungskammer (VKB) Group (Bayerische Beamtenkrankenkasse and Union Krankenversicherung) have opted for the software of adesso insurance solutions to modernize the proposal and policy systems of their private health insurance. After an intensive selection process with several joint workshops and a technical proof of concept, the insurance group chose in|sure Health Policy (including the in|sure Health Collective modules) for its collective business, and in|sure Proposal Health for its proposal system. adesso develops custom quote, rate, and proposal methods, and implements these methods with standard interfaces in its standard software. The upgrade of the proposal and legacy systems is part of the modernization strategy of the two insurers to move away from monolithic host systems and achieve a high level of automation. In addition, product development processes are to be simplified and a quick TTM (time to market) achieved.

The project – including the full-scale data migration – is scheduled to be completed by the end of 2027. MIGSuite, adesso's software solution for technically complex data migrations, will be used to efficiently migrate the legacy system.

To facilitate the use of the new technology as much as possible, employees at the Versicherungskammer Group will receive professional and technical training during the "in|sure Academy".

"By modernizing our application landscape, we're putting our customers and partners at the very heart of our business," declares Isabella Martorell Nassl, Chairwoman of the Board of Management of the health and travel insurers of the Versicherungskammer Group. "We were extremely impressed by the high level of automation and standardization, and we now look forward to further developing our trustworthy relationship with adesso insurance solutions."

"We're proud that one of Germany's largest private health insurance providers has chosen us," says Oliver von Ameln, Managing Director at adesso insurance solutions, of the partnership. "With our in|sure products, we'll help VKB to future-proof, simplify, and consolidate its existing sales and legacy systems."

Versicherungskammer Group

The Versicherungskammer Group is the largest public insurer in Germany, and the seventh-largest primary insurance provider in Germany. In 2022, it generated just under 9 billion euros (preliminary figure) in income. The group has companies in Bavaria, Palatinate, Saarland, Berlin, and Brandenburg. It provides health insurance for the Sparkassen-Finanzgruppe, and operates throughout all of Germany, along with other public insurers. The Versicherungskammer Group places the utmost importance on its social commitments. Its sustainability-oriented strategy of promoting volunteer organizations and initiatives, which in particular are active in the field of prevention & security, has been reinforced for several years by its foundations, the Versicherungskammer-Stiftung and the Versicherungskammer-Kulturstiftung. The Versicherungskammer Group was recently named a family-friendly company by "berufundfamilie" for the third time. It has around 7,000 employees, including 290 trainees.

adesso insurance solutions

The software company adesso insurance solutions, a wholly-owned subsidiary of the listed company adesso SE, develops and implements standard software for the international insurance market. On its in|sure platform, the Dortmund-based company bundles release-ready standard software products, and also offers software and service solutions that are designed to manage its customers' technical business processes. All in|sure products cover an insurance company's core processes. in|sure products can be used as an entire in|sure Ecosphere application landscape or as individual, customizable components that can be combined with one another. in|sure Ecosphere includes systems for all lines of insurance. These include solutions for portfolio management, benefit and claims processing, partner management, and the commission and collection/disbursement process. The in|sure Ecosphere also features end-to-end process control and a central workplace for processing claims. adesso insurance solutions also offers a system for software-assisted data migration and self-learning AI for seamless background processing.
