pensions and time accounts

The universal system for company

in|sure CollPhir
The universal system solution for company pensions and time accounts

Digitalization affects company pensions as well. In addition to employee portals that are accessible through internet access at home or at terminals in the company, increasingly more mobile software solutions are being used for the communication of company pensions. The interaction with the employee is in the foreground, just as the possibility to make company pensions perceptible and to give employees the opportunity to plan independently.   S i m u l t a - neously, the administration of company pensions requires an increasing automation of processes to sustainably increase productivity in administration.

With in|sure CollPhir, we offer you a standardized software solution for the administration and communication of company pensions. All technical and legal matters in the administration of operational models of company pensions and time accounts are considered.

in|sure CollPhir includes:

+ Direct commitment

+ Provident fund

+ Target pension

+ Riester (company pension)

+ Time accounts

+ Pension fund

+ Pension plan

in|sure CollPhir

is our comprehensive software solution for the administration of all implementation paths in company pensions and lifetime working accounts. The system ensures the efficient handling of processes during both the entitlement period as well as the service phase.

Our portal solutions complement the inventory management as a service portal or permit browser-based contract management. In the context of company pensions and time accounts, they ease the communication of the participating individuals / institutions and therefore the fulfilment of legal information obligations
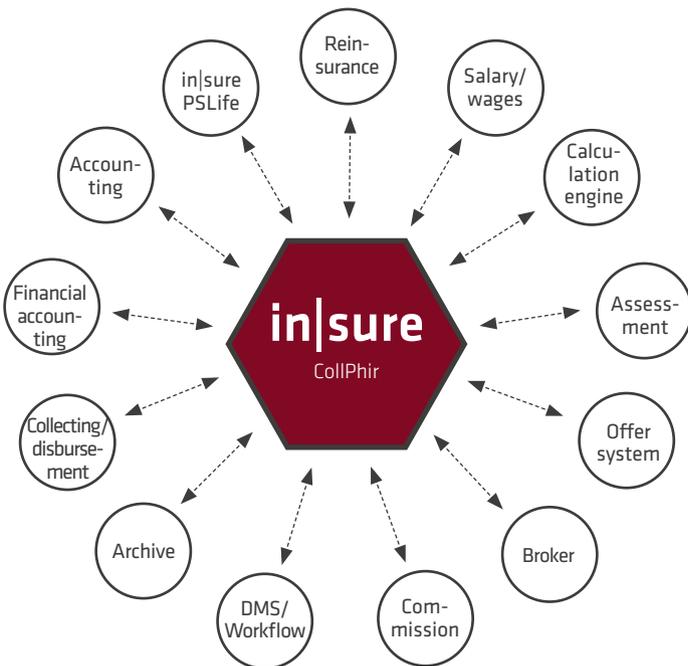

The features

in|sure CollPhir is a software solution that was specifically created for your processes in the administration of direct commitments, support funds, pension funds, pension schemes, direct insurances and time accounts. In order to cover pension provisions, in|sure CollPhir also allows you to manage target pensions as a pure contribution commitment within the scope of the social partner model. On the one hand, the system can be used for the administration of smaller inventories (for example, real estate agents) and is also designed so that case numbers (corporations) can be managed efficiently.

in|sure CollPhir offers a majority of its processes in the basic configuration and supports automated business processing in many concerns. This increases your productivity for contract management, creates transparency and improves your service.

The technically comprehensive representation of individual requirements as well as flexibility and sustainability are properties that make in|sure CollPhir so valuable to our customers.

+ web-based portal solution for employers and employees (for all end devices)

+ graphic user interface to model pension provisions and service plans without programming knowledge (pension provision calculator)

+ modular design to manage all relevant stakeholders (for example, pension institutions, insurance companies, employers, employees, brokers)

+ Automation of important business cases

+ Management of insurance-based and non-insurance-based product solutions

+ Standard interface to process employer messages

+ Creation of model calculations for the annual benefits statements

The technology

Just like all products from the in|sure family, we are constantly developing in|sure CollPhir. We provide you with products that are always technologically and functionally up to date.

+ Multi-layer, scalable web application with open source frameworks, based on 100 percent object-oriented technologies

+ Eclipse development environment with plugins for Eclipse Modelling Framework (EMF), bug-tracking code quality, TestNG (unit test), etc..

+ Masks: Angular

+ TInterface test: Tosca, Selenium

+ Continuous integration: Maven (with Jenkins, Nexus, Sonar)

+ Source code management: SVN (others possible)

+ Interfaces: eGECKO, audit-proof archive

Furthermore, the following applies to in|sure CollPhir, just as for all our in|sure products:

+ Portability in a cloud technology

+ Flexible adapter concept for existing peripheral systems that can be connected synchronously or asynchronously

+ Support of the DB/2 and Oracle databases

The advantages

in|sure CollPhir is individually adaptable and offers the necessary flexibility to implement an inexpensive enhancement and adaptation to current developments and legal provisions in pension management. Our software solution additionally offers you the following advantages::

Faster processing

Significant business processes are shown within in|sure CollPhir in an automated manner. Through this, your processing time per claim is reduced and productivity in contract management is significantly increased.

Integrated

All administrative processes during both the qualifying phase and the service phase up to their completion can be processed with one system.

Transparent

As a web-based portal solution, employees can access all data regarding their private and occupational benefits.

Comprehensive know-how

Our knowledge and our abilities go beyond that of a normal IT service provider. Thanks to our experts from the areas of company pensions and working time accounts, we do not just understand the technical requirements for effective pension management, but rather the professional ones as well.

Flexibel

in|sure CollPhir is platform-independent and can be integrated into existing IT landscapes thanks to diverse interfaces..

Simple

Through the use of an intuitive user interface, the user is guided purposefully through the program.

The extra

Within the scope of our partnership forums, we offer you the possibility to actively cooperate in theenhancement of our products in agreement with user needs.

This has other advantages:

+ faster provision of new features

+ inexpensive development through cost sharing

+ secure identification and implementation of industry-wide requirements (for example, regulatory changes)

With the decision for in|sure CollPhir, we guarantee you our complete support during integration. This, of course, includes the migration of your existing data. You decide if the migration should be performed on demand or through a different strategy. With a team of experienced developers, consultants and insurance experts, we perform the change process together with you on site. This ensures a smooth integration of your new partner system and makes it easier to begin using in|sure CollPhir on a daily basis.
